## Quiz Instructions

Dear Class,

This assessment is based on one used by a company in the Bay Area on a quarterly basis. Generally, the employee and several of the employee's colleagues fill this out as part of the determination if the employee should get a raise. There is one extra set of questions pertaining to the final group presentation.

My intent in using this survey for this course is to give you all an opportunity to reflect on your effectiveness in your project, your Final Presentation, and your Final Report. You also get to answer the same questions for your teammate(s).

5 bonus points are awarded for the completion of this survey, but what you put into this survey is not going to be considered in your grade, so you do not need to be "better" than anyone else. Please be as honest as possible and don't worry about seeming either too generous or too harsh; just choose the answers you think best reflect your and your teammates' performance.

Best,

Prof. Radlauer
